Our Daily Mission

At **Phoenix Oil**, we know there are several options available to our customers, which is why besides paying up to date competitive prices for your used oil, we also offer our filter and antifreeze collection to our customers at no charge. Our collection experts are also highly knowledgeable and capable of assisting our customers in managing their recyclable materials, giving your business the edge it needs to succeed.

Preserving our Environment

We love the great state of Texas and the many gifts that nature has bestowed upon us, which is why we work hard to preserve that beauty. As a recycler, we understand the many impacts oil and related products can have on our environment and community, which is why we constantly strive to maintain and excel past the expectations of our customers, while also keeping in compliance with all State and Federal Regulatory agencies. While there are many ways to reuse your recoverable materials, there is only one Texas, join us in keeping Texas green.

31

*years of
excellence:*

In 1981 a struggling teacher with a young family, purchased his first oil collection truck with the hope that it would change the life of his family, giving them opportunities that he never had. After 31 years, Scott's vision has blossomed into a successful oil collection and transportation company servicing thousands of customers throughout Texas, with an emphasis on outstanding customer service and highly trained and experienced operators. Much like the growth of **Phoenix Oil**, Scott's family has also grown with this company, turning 31 years of excellence into a family tradition.
